

TAKE TIME TO COMPARE

Learn how the **UnitedHealthcare Choice Plus Plan** with a **Health Savings Account** compares to a traditional co-payment plan.

If you've had a traditional co-payment plan, you may be wondering how it is different from the **UnitedHealthcare Choice Plus Plan with a Health Savings Account (HSA).**

1

YOUR HEALTH CARE BUYING DECISIONS

The Choice Plus Plan with a Health Savings Account (HSA) helps you take a more active role in health care buying decisions:

What is a...?

• Premium:

The amount that must be paid for your health insurance or plan. You and/or your employer usually pay it monthly, quarterly or yearly.

• Deductible:

The amount you owe for health care services that your health insurance or plan covers before your health plan begins to pay.

A Higher Deductible and a Lower Premium

- Traditional co-payment plans typically have a lower deductible and higher premiums, so you pay more up front and less when you need care.
- This plan has the opposite – a higher deductible but lower premiums.

Why this matters

You typically pay less up front with lower premiums and more for care when you need it. This way, you only pay for the care you need, which may save you money.

A Health Savings Account (HSA)

- You have the option of opening a health savings account, if you are eligible. An HSA is a personal bank account that you own.
- You can use the HSA to save money, federal income-tax free, to pay for qualified medical expenses. Or, you can save the money for a future need – even into retirement.
- If you spend the money in the HSA wisely, you can save more money and have more money available for when you really need it.
- You own the money in the HSA. There is no “use it or lose it” rule. If you choose to leave your employer or switch health plans, you keep the money.

Why this matters

You decide how and when to use your HSA dollars.
